## Job Description

---

**Title:** VP Network Operations

**Department:** Administration

**Manager:** CEO

**Supervision of Others:** Yes

**Location:** San Diego

**FLSA Status:** Exempt

**Job Type:** Full Time

### Summary

Nextivity develops the award-winning line of Cel-Fi products, and their underlying IntelliBoost chipsets, that optimize cellular coverage across a range of enterprise, business, residential, and transportation applications. As part of a growth initiative with an increased focus on maximizing the value from cloud-based services, Nextivity is seeking to expand their senior leadership team with the addition of a business focused VP Network Operations. Nextivity has an industry leading product and IP position and is profitable. Additionally, Nextivity is well capitalized, closely held, and benefits from strong shareholder and board alignment. All design work is executed from the Nextivity HQ in San Diego, CA where this position is based. Manufacturing is performed by off-shore CM partners.

### Essential Duties and Responsibilities

The VP Network Operations will support the execution of Nextivity's growth plan as defined by the CEO and the Board of Directors. The VP Network Operations will report to the CEO and will be responsible for

- Cloud operations
  - Existing SOC2 compliant cloud operations for remote monitoring and management of all Cel-Fi equipment
  - New cloud based 5G networking developments.
- Customer support
- Quality and System Testing
- IT

Within each of these areas, the VP Network Operations will be responsible for all aspects of defining and executing the Nextivity plan. This includes on-time product delivery, support for new product development, managing teams and budgets, growing and nurturing the next generation of Nextivity leaders and forging strong relationships with Nextivity current and future partners.

Nextivity, Inc.  
16550 W Bernardo Drive, Suite 550, San Diego, California 92127  
Telephone: 858.485.9442

### **Must Have Attributes:**

- COO, CEO, VP Network Operations or like experience with an OEM or Service Provider.
- A strong background in cloud software deployments.
- Able to operate in a fast-paced environment.
- Able to harness the combined knowledge and experience of the team to solve problems in innovative ways.

### **Nice to Have Attributes:**

- Experience in 5G networking
- Experience in the wireless, telecom, networking equipment, and/or IoT industries
- Setting up and running a 24x7 support organization

### **Skills and Abilities**

- Good English conversion and writing skills preferred
- Excellent communications skills, ability to negotiate and work with customers at all levels
- Possess good working attitude and highly effective in executing plans, feedback market and customers' requirements and efficient usage of resources
- Self-driven and ability to work independently to achieve results
